Harini Washer Extractor

Washer Extractor is especially designed by our experts with premium quality as per the needs of the users. that can be used in hotels, hospitals, Laundry business etc., and commercial laundries. We maintain SS Grade 304 stainless steel, heavy duty motors to ensure high efficiency with low power consumption. Inner drum electronic balancing. Designed water inlets and drains are largest in size in order to fill & discharge the hot, cold and recycled water with minimum time. Jerk less operation with soft start & stop.

Harini Laundry Equipments is Specially designed for small dry cleaners, Small hotels, Small laundries, Beauty Salons, Restaurants, etc. Where people want to save space and make low-cost investment in laundry equipment.

Fully automatic 3 in 1 laundry machine, Developed for industrial use, This unit is a combination of washer, Extractor and dryer in the same machine.

Stack Washer Dryer

Harini Vertical Washing Machine

This a front loading Washing Machine. This machines used in all types of laundry & garment washing. Both the outer drum and the inner drum are made of Stainless Steel 304. The machine has multiple safety features including door limit switch, voltage filters etc. Heating for the wash is via direct steam line through stainless steel electrical heating elements. The chemicals go through the inner drum via a stainless steel chemical box fitted on side of the machine. The water inlet, drain connections can optionally be converted to a complete automatic set up. There is a water level indicator fitted on the machine to notify the water level of the machine.

Harini Horizontal Washing Machine

This a top loading Washing Machine the outer drum and the inner drum are made of Stainless Steel 304. The machine has multiple safety features including door limit switch, voltage filters etc. Heating for the wash is via direct steam line through stainless steel electrical heating elements. The chemicals go through the inner drum via a stainless steel chemical box fitted on side of the machine. The water inlet, drain connections can optionally be converted to a complete automatic set up. There is a water level indicator fitted on the machine to notify the water level of the machine.

Harini Hydro Extractor

The Hydro Extractor is used to remove lasting moisture from garments. These machines made with Stainless Steel 304 with breaking system. This is to bring the inner basket to stop completely of each cycle. The electrical control panel is designed to set the timer. The machine is provided with a rubber buffet system that absorbs the force and vibration. Loading door is controlled by a safety switch that automatically stops the machine in the event of door getting opened while running.

Tumble Dryer Steam/Electrical

We Adopted advanced air channel structure, and controller air circulation technology. It can effectively improve heat exchange rate, Shorten drying time and save the energy. Adopted advanced computer control system, It can automatically control working temperature and drying time according to the material of clothes or fabric. The tumbler is made of 304, And flange axis is also made of superior quality stainless steel. With dual rotation system of drum, To avoid tangling of clothes.

Flat work Ironer (Electrical)

The flat work electrical ironer is used to iron all flat articles such as bed sheet, pillow covers, table cloth, napkin etc. Directly after the extraction process, to produce a quality finish the ironing chest heating is nickel plated to protect from rusting. The moving chest is self aligning Equipped with adjustable/manual timer controller. Safety features like finger guard, Manual break, Emergency stop etc..has been installed
